### Let's Start!

Writing Spot: What color is this shirt?

## Learning Outcome

Exchange advice and suggestions in communicative situations.

### Ask your partner:

- Does anyone in your family have poor eyesight?
- When were they diagnosed?
- Do they wear glasses? Should they wear glasses?

## Can Do Statements

- I can write about common health problems.
- I can write a short health pamphlet.
- I can ask for and give advice.

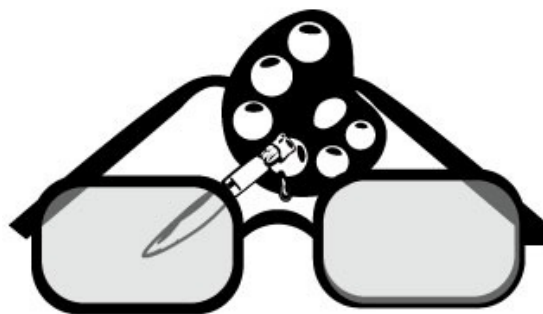

## Let's Explore!

Can you imagine seeing the world without color? What's the **diagnosis**\*?

\* A "*diagnosis*" is the act of identifying a disease, illness, or problem by examining someone.

*Instructions: Read the text aloud.*

No one should take their sight for granted. Can you imagine a world without colors? In fact, some people cannot see certain colors. They have a condition that is called achromatopsia, or color-blindness. Color-blind people are usually born with the problem, but sometimes it may develop later.

Total color-blindness in people is very rare and is caused when certain parts of the eye, called cones, do not work properly. Usually, only some of the cones do not work. Then the person cannot tell the difference between red and green.

There is no cure for color-blindness despite modern medical technology, but color-blind people have no problem living a normal life. They might have trouble driving, since they cannot tell the difference between the colors of traffic lights. They have to learn to remember that the red light is at the top and the green one is at the bottom. Recently, companies have developed new technology that allows sufferers to see some color with special lenses. One advantage that color-blind people do have over others is that they can see hidden objects and animals better than other people. There have even been cases when certain armies hired color-blind people to find hidden enemies. What advice would you give someone trying to hide from a person with color-blindness? You should definitely choose a good hiding place!

## Let's Practice!

Do you have any advice?

*Instructions: Organize the mystery sentences. Read the sentences aloud. Check your pronunciation with your instructor.*

1. good / hiding / a / You / should / choose / place! / definitely  
\_\_\_\_\_
2. Color-blind / are / later. / with / may / develop / it / sometimes / usually / the / but / problem, / people / born \_\_\_\_\_
3. take / sight / No / their / one / should / for / granted  
\_\_\_\_\_
4. give / What / color-blindness? / a / from / hide / you / person / advice / to / trying / with / someone / would  
\_\_\_\_\_

## Let's Practice!

What should I know about this disease?

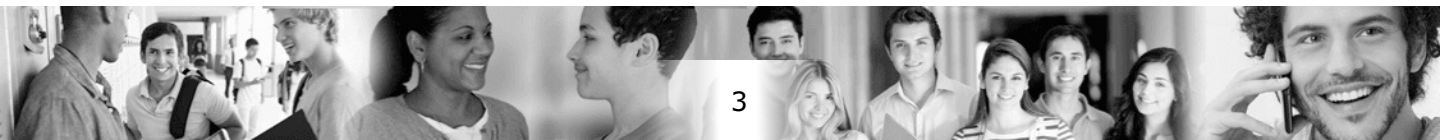

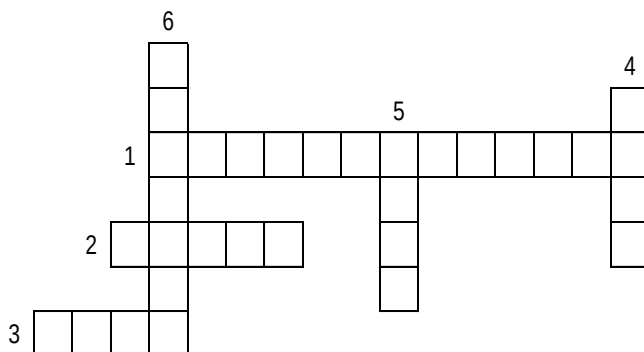

*Instructions: Read the definitions. Complete the crossword. Use the words to model a conversation with your partner. Switch roles.*

### Across

1. a condition where a person would see only black, white and shades of grey
2. unable to see
3. part of the back of the eye that lets a person see color

### Down

4. not common or usual
5. a large group of organized to soldiers fight battles on land
6. organized bumps that help people with vision problems to read

## Extension Activity

It's time to write a pamphlet. Can you provide some advice?

*Instructions: Complete the following steps. Fill in the Self-Assessment.*

- Go online and research a disease in your community.
- Create a 100 word health pamphlet.
- Include any information on whether new technology or gadgets can improve a person's quality of life.
- Read the pamphlet aloud to a partner and share your pamphlet with family and friends.

### Self-Assessment

Yes No

I research a disease online.

☐ ☐

I find information about new technology or gadgets that may help sufferers.

☐ ☐

I create a health pamphlet.

☐ ☐

## Target Words

- achromatopsia** (noun): a condition where a person would see only black, white and shades of grey  
e.g. They have a condition that is called achromatopsia, or color-blindness.
- blind** (adjective): unable to see  
e.g. We can learn a lot from blind people.
- cone** (noun): part of the back of the eye that lets a person see color  
e.g. Total color-blindness is caused when certain parts of the eye, called cones, do not work properly.
- army** (noun): a large group of soldiers organized to fight battles on land  
e.g. There have even been cases when certain armies hired color-blind people to find hidden enemies.
- to take something for granted** (expression): to expect something or someone to always be available  
e.g. No one should take their sight for granted.
- cure** (noun): a treatment that successfully addresses a problem, usually medical  
e.g. There is no cure for color-blindness.
- rare** (adjective): not common; unusual  
e.g. Total color-blindness in people is very rare.
- lens** (noun): a clear curved piece of glass or plastic that is used in eyeglasses  
e.g. Some companies are developing special lenses.
- braille** (noun): organized bumps that help people with vision problems to read  
e.g. There are some new gadgets like braille cell phones that assist people with vision problems.

## Learning Points

---

### Writing A Pamphlet

Pamphlets should be used when you want to give people more information than you can put on a poster.

Pamphlets can:

- explain an issue to the community like health and wellness
- inform people of their rights
- win support for a cause

Pamphlets are a simple way of providing information.

## Learning Points

### Modals for Advice and Speculation

#### Modals For Advice

We use **should** to make suggestions and give advice:

*Example: You should have an eye examination.*

We use **could** to make suggestions:

*Example: We **could meet** after the appointment.*

You use *should* for advice in the present and in the past.

Subject + Should + Base Verb

Should + Have + Past Participle

#### Modals For Speculation

You use modal verbs might, may and could + an infinitive form when you think something is possible.

- **might/might not** + infinitive
- **could/could not** + infinitive
- **may/may not** + infinitive
- **can/can't** + infinitive

| Modal  | Explanation                                                                        | Example                                                                                          |
|--------|------------------------------------------------------------------------------------|--------------------------------------------------------------------------------------------------|
| Should | Used to make an assumption about what is probably true                             | <i>My friends should be there by now.</i>                                                        |
| Can    | Used for something that is generally possible, something we know sometimes happens | <i>Can you imagine a world without colors?</i>                                                   |
| Might  | Used for something we think will have a 40% chance of happening                    | <i>They might have trouble driving.</i>                                                          |
| May    | Used for something we think will have a 50% chance of happening                    | <i>Color-blind people are usually born with the problem, but sometimes it may develop later.</i> |
| Could  | Used for something we think will have little chance of happening                   | <i>The result could be better.</i>                                                               |
