Let's Start!

Staying healthy ... the Easy Does It way!

Learning Outcome

Identify and describe events in the news in a range of social and work contexts.

Ask your partner:

- Do you think you are a serious person? Why or why not?
- What are the advantages of being serious? What are the disadvantages?
- Who do you know who is very serious? Who is not serious?

Can Do Statements

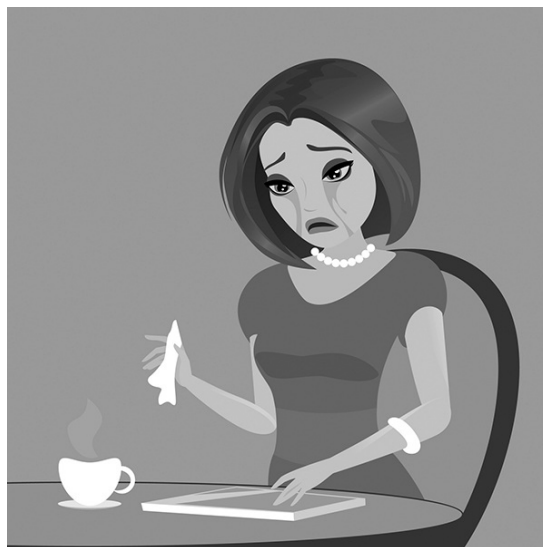

- I can talk about staying healthy.
- I can talk about someone's feelings and reactions.
- I can discuss how to deal with problems.

Let's Explore!

This text is an advertisement in *Cambridge Life* for a unique workshop.

Instructions: Read the text aloud.

Are you depressed? Do you feel that you are easily distracted? Easy Does It Workshops help individuals and groups overcome the problem of being overly serious.

Are you ...

- a nurse or doctor who works long hours?
- a member of a football team that hasn't had a victory celebration in ages?
- a bus or taxi driver who loses patience with traffic jams and rude passengers?
- a single, working parent who has trouble coping with family and job-related responsibilities?

If one of these distressing situations applies to you, our specially trained team of psychologists could teach you:

- how to cope with disappointment and loss
- how (and why) to become totally silly
- how to make humor a regular part of your life
- how to overcome failure and embarrassment
- how to avoid becoming a workaholic

Our workshops could help you solve the frustrating problems that are weighing you down. They will help you gain back your sense of humor and take pride in your accomplishments. You should join one of our groups. Within two months, a relaxed smile will replace that tense expression on your face.

Let's Practice!

Workaholics beware! Don't take life too seriously!

Instructions: Read the advertisement again. Select all the correct answers. Practice saying the sentences aloud with a partner. Correct each other.

Learning Points

Talking About Someone's Feelings and Reactions

You talk about feelings and reactions using adjectives.

Adjectives that end in **-ed** are used to describe how a person feels, like *depressed, distracted, distressed, surprised, worried* or *tired*.

Adjectives that end in **-ing** are used to describe things and situations, like *depressing, distracting, distressing, worrying* or *tiring*.

These adjectives describe the *effect* something has on a person.

Examples:

- *Depressed? Easily distracted? Easy Does It Workshops help individuals and groups overcome the problem of being overly serious.*
- *If one of these distressing situations applies to you, give us a call!*

Discussing How to Deal with Problems

To discuss how to deal with problems such as health issues, you can use modals like *might, could, or should*.

These modals can go at the beginning of the sentence, or after a clause starting with "If ...".

The modal is followed by a verb in the base form. You do not use "to".

Examples:

- *Our specially trained team of psychologists could teach you how to cope with disappointment and loss.*
- *You should join one of our groups, and within two months, a relaxed smile will replace that tense expression on your face.*
